Education

University of Waterloo

June 2027 (Expected)

Honours Bachelor of Computer Science - Business Specialization

Waterloo, ON

- **Relevant Courses:** Data Structures, Object-Oriented Programming, Operating Systems, Introduction to Database Management, Introduction to Business Organization, Logic and Computation, HCI (In Progress), Computer Networks (In Progress)

Experience

UofT Esports (UTES) | Figma

March 2026 – Present

Web Designer

Waterloo, ON

- Engineered modular UI layouts for the CIE website, including implementing collapsible sections for panelist listings to reduce page clutter and improve readability.
- Optimized user flow and engagement by redesigning CTA placements and including social media integrations for panelists, providing high-fidelity components that were integrated into the final production site.

Futures Lab x Google Learning Re-imagined Workshop

January 2026 – March 2026

Team Member

Waterloo, ON

- Co-engineered an AI-driven sign language prototype using Google AI Studio and computer vision to enable real-time hand detection and proficiency scoring.
- Introduced the AI conversation partner feature, outlining the interaction logic and user flow to ensure a seamless experience for language learners.
- Presented technical demonstrations to industry professionals at the Google Symposium, articulating the project's impact on digital accessibility and AI-assisted education.
- Supported the team's "Best Creative Artifact" win by executing an outreach strategy that successfully converted booth visitors into active prototype testers via physical-to-digital onboarding.

UWMSA | React, TypeScript, Figma

January 2025 – April 2025

Tech Lead

Waterloo, ON

- Designed and implemented UI components and features for the MSA mobile app, enhancing user experience for a community of 4500+ students.
- Debugged and refactored the existing codebase to resolve performance bottlenecks, improving app stability and facilitating the integration of new features.
- Contributed to feature iteration by providing design suggestions during weekly meetings and translated Figma specifications into functional code, ensuring all development aligned with intentional system architecture.

Projects

Pokédex | React, Node.js, Tailwind CSS, MySQL, GitHub

May 2025 - August 2025

- Collaborated in a team of 4 to develop a full-stack responsive Pokédex web app using React, Node.js, Tailwind CSS, and MySQL to create a user-driven interface.
- Integrated a MySQL database and REST API to enable user accounts and support retrieving, filtering, adding, deleting, and updating Pokémon data, as well as trading and viewing other user profiles.
- Designed a clean, dynamic UI to ensure smooth user flow and intuitive interactions, enhancing overall user experience.

Wealthsimple Live Case Project | Word, Excel, PowerPoint

September 2022 - December 2022

- Designed an implementation strategy that saves \$4 to \$4.5 million, allowing reinvestment in other projects and marketing campaigns to attract customers outside of university campuses.
- Utilized PEST factors, Porter's Five Forces, Diamond-E framework, Gantt charts, cost-benefit analysis, heat maps, and mitigation/contingency planning to create a strategy aimed at increasing engagement among university students while generating \$833K to \$1.25M in annual recurring revenue for the university.
- Led a team of 4 to the quarter-finals in an interclass competition with over 500 students by scheduling and facilitating weekly scrum meetings.

Technical Skills and Certificates

Languages: Python, C, C++, HTML, CSS, JavaScript, TypeScript, SQL, Bash, SwiftUI, Kotlin, MIPS, ARM

Frameworks/Libraries: React, Node.js, pandas, NumPy, Expo, Framer Motion

Tools/Platforms: Git, GitHub, Vite, Microsoft Excel, Microsoft Power BI, $\text{\LaTeX}$, Docker, AWS, MongoDB, Figma, Trello, Jira, Xcode, Lucidchart, Agile, Notion, Jupyter Notebooks

Certifications: Futures Lab x Google Learning Re-imagined, EA Software Engineering (Forage), HP Software Engineering (Forage), Lloyds Banking Group (Intro & Advanced UX Design on Forage) (Job Simulations)
